

International Conference on Advanced Sensing,
Condition Monitoring, and Intelligent Maintenance
Innovations (UNified 2026-SMMI)

CERTIFICATION OF SPEECH

Peng Chen

Distinguished Session Speaker: Exploring Collaborative Characterization and Decoupling Diagnosis of Transient Features from Multi-Source Coupled Signals in High-End Equipment under Broadband Transient Interference

is an Oral Speech on International Conference on Advanced Sensing, Condition Monitoring, and Intelligent Maintenance Innovations (UNified 2026-SMMI) held in Guangzhou, China during May 13-16, 2026.

Organizing committee of 2026 UNified Conference
on Advances in Maintenance Engineering, Damage
Assessment and Machinery Diagnostics
